Other notable features: 21 vols., 20 leaves per volume with last volume having 22 leaves, each hermetically sealed in plastic and in a plastic binder envelope. Each leaf has some sign of decay; many are in pieces. The MS is dark and does not show much purple. Often they are in the binder so tight that it forces waves of plastic (that are particularly hard to photograph because they catch any light). The plastic could potentially cause the plastic in which the MS leaves lay to bend/warp.
