<sup>1</sup> Page count listed is the written number not the actual page number. The folio numbers are not correct throughout; the first leaf starts with the number “2,” which is hard to see but written up at the top right-right corner in pencil. Then they are correct up to folio “141.” Then there are three “141” leaves, two “161” leaves, and no number on the fragmentary folio of what would have been “177” based off this folioation. The MS ends on folio “178.”

**Additional matter:** binding strips (2) = **Total Images 2**

**Text:** 178 (360) = **Total Images 360**

**UV (MS leaf numbers, not ours): 261 Total Images**

**Notable features:**

The MS shelf numbering system has now changed. The old numbers follow the Zagora Historical Library's catalogue. These old numbers are the numbers in the *K-Liste*. The new number for this MS is now "1". The box which the MS is kept in also has "χ 001" in pencil on the side of the box. There is a purple-colored stamp that is now on every MS, usually on the first page. It reads, "Βιβλ. εισαγωγης αριθ. \_\_\_\_\_" In the space with the line is the handwritten new number of the MS. In this case, again, it is now the number 1.

The MS has no hardcover and is in semi-poor condition because of water damage. The water damage is all the way through the MS. UV will be required on selected pages where the text is unclear.

The MS came with an envelope containing material from the binding.

The MS was wrapped in paper. There is no text on this paper.

Still has the spine, but it is in bad condition. There is a sticker on it with the old shelf number system. This sticker has 2 on it.

Quire 20 was a ten leaf quire but it has seemingly lost leaves. Middle of quire is in between 153b and 154a, with only f. 154 and 155 present. New quire starts 156a.

Quire 21 is a 6 leaf quire, seemingly with one leaf missing, making 5 present.

Quire 23 back to an 8 leaf quire.

Quires 23 and 24 are badly damaged.
