<sup>4</sup> [138] = 137; on this leaf *all* the text is supralinear (very hard to tell elsewhere). This seems to support the hypothesis below in n5 that this is a late 10<sup>th</sup>/early 11<sup>th</sup> MS.

<sup>5</sup> The lines are more pronounced on these leaves and, more importantly, some of the letters are supralinear while others are infralinear. In other words, the scoring seems to have been done for prior MS. However, there are so many such leaves and there is no other evidence for a palimpsest that it seems more likely that this scribe was simply sloppy. A third possibility is that the scribe wrote out this MS at the end of the 10<sup>th</sup> or beginning of the 11<sup>th</sup> century, when the template was changing for Greek MSS from supralinear to infralinear. Most likely, it is a combination of the last two possibilities. See also ff. '53', '54', '70' (on this leaf, which is actually 69, the scribe goes virtually diagonally across the scored lines—see verso), '73', '74', '75', '77', '84', etc. In particular, the scribe tends to start out writing supralinearly, with the lines creeping toward an infralinear look (through an intralinear line or two!).
